I. About Qwest Helicopters

1) Who we are:

Qwest Helicopters Inc. Was established in BC, Canada in 2002. The company operates in the mountainous region of British Columbia under a Transport Canada Air Operators Certificate. Qwest Helicopters owns and operates a fleet of 16 helicopters supporting Government agencies, the Oil & Gas industry and many commercial and corporate clients.

The **Qwest Helicopters** branch in Georgia received Georgian CAA approval on passenger transportation in April of 2018. The branch in Georgia was formed with the aspiration of developing a high class air service with the synergy of international and local experts that would stand out in the regional market. Qwest Helicopters has focused its efforts on quality and safety, the company is establishing long-term relationships with their customers. By understanding our customers' needs we can work with them to increase efficiency, reduce costs and build on safety!

I. About Qwest Helicopters

(continued)

2) Qwest Helicopters fleet:

Qwest Helicopters fleet includes 16 helicopters: Bell 206 Jetranger, Bell 205 A-1 Huey, Eurocopter AS350 Ecureuil / Astar and Eurocopter AS365 N1 Dauphin helicopters.

I. About Qwest Helicopters

(continued)

2) Qwest Helicopters fleet in Georgia:

Qwest Georgia currently operates two AS350 Ecureuil / Astars.

The Ecureuil family of turbine powered rotary wing aircraft is manufactured by Eurocopter and is considered to be the safest, most reliable aircraft of any kind flying throughout the world.

Over 6,200 members of the Ecureuil family have been delivered in nearly 120 countries for more than 1,900 operators. Together these aircraft have accumulated more than 32 million flight hours.

In 2005, the AS350 B3 gained the world record for the highest-altitude landing and take-off performed on Mount Everest at 8,848 metres (29,029 feet), a title still held today. On 19 May 2013 the AS350 B3 performed the world's highest long-line rescue operation on Lhotse, the world's fourth highest mountain located in the Himalayas at 7,800 metres (25,590 feet). Now with Qwest Helicopters Ecureuil / Astars you can explore Caucasus Mountains.

I. About Qwest Helicopters

(continued)

2) Qwest Helicopters fleet in Georgia:

We have one helicopter in Tbilisi and one in Batumi to cover entire Georgia.

AS350 Helicopter Technical Data:

- Useful load of 1,400 lbs.
- Endurance of 3 hours
- Max Speed 155 kn.
- Has 5 passenger seats.

The AS350 has acclaimed worldwide success as the most popular single engine helicopter in its class. The spacious cabin offers amazing visibility with a five seat configuration ideally suited for corporate transport and tourist flights.

III. Our Services

1. Corporate & VIP Transportation:

Helicopters are sophisticated machines which may never be the lowest cost option. However in relation to other means of transport they can be safer and time efficient making them economically viable. Helicopters are able to utilise space which is not available to other means of transport and Helicopters can overcome increasing congestion in downtown traffic, on highways or open roads to airports by flying past construction, accidents and traffic jams which can cause a great inconvenience.

Helicopter is capable of transporting 5 Passengers:

- 1 passenger is seated next to the pilot
- 4 rear passengers are seated in a row

III. Our Services

(continued)

2. Helicopter Tours:

City tours - 5min flight 100 Gel per passenger (5 passengers);
City tours - 10min flight 170 Gel per passenger (5 passengers);
City tours - 20min flight 320 Gel per passenger (5 passengers);

Helicopter tours are a great way to experience flight as well as to see the local sights.

Employing Helicopters for tourist flights will create a view with increased visibility having a significant value for money impact on travellers.

III. Our Services

(continued)

6. Aerial Photography:

Taking pictures out of a helicopter is one of the greatest and most rewarding things anyone has done as a photographer. It grants you access to unparalleled views that you would never see otherwise.

<https://www.qwesthelicopters.ge/services>

III. Our Services

(continued)

7. External Load, Short and Long Line Operation:

We provides helicopter external load operations in some of Georgia's most remote areas. Access to these areas is difficult or some times simply impossible by road due to the lack of infrastructure, long driving time and other logistical hurdles.

Aerial construction work

Aerial construction has many advantages over the use of crane services. Utilizing a helicopter eliminates the setup and tear down costs of employing a conventional crane.

In some cases, it is impossible to use cranes and that is where helicopters come in.

Seismic & Geophysical Survey

The use of helicopters for geophysical survey, aerial mapping and seismic operations has been a positive step in environmental protection because it allows collection of data and mapping of large areas with little impact on the ground.

IV. Our Clients

Qwest Helicopters Inc has provided safe and quality service to:

- Advantage Tower Ltd.
- Aeolis Wind
- Altec Inspections
- Apache Canada
- ARC Resources Ltd.
